

JOURNAL OF THE MECHANICAL BEHAVIOUR OF MATERIALS

VOLUME 19, NOS. 2-3

2009

TABLE OF CONTENTS

From Micro to Macromechanics: A General Way of Obtaining Macroscopic Description from Microscopic Variables M. Holeček	105
Atomistic Foundation of Solid Mechanics and Thermomechanics K. Takahashi and Y. Yasui, M. Nakane	115
Semi-Dense And Concentrated Fullerene-Based Composites: Microdeformation and Strain Gradient Effects G. Augusti, P. M. Mariano and F. L. Stazi	125
Asymptotic Homogenization Technique for Stress and Strength for Some Non-Linear Elastic Problems with Near Periodic Structure J. Orlik	133
Homogenization for Contact Problems with Known Microroughness of the Contacting Surfaces J. Orlik and Alexei Zhurov	143
On a Computational Strategy with Time-Space Homogenization for Heterogeneous Materials Anthony Nouy and Pierre Ladevèze	151
Micromechanics and Mesomechanics of Laminates: Synergy and Model Improvements P. Ladevèze, G. Lubineau and D. Marsal	159
Through-the-Thickness Deformation of Composite Laminates Subjected to Bending J. Botsis, Th. Gmür and F. Bosia	167
An Interface-Multilayer Model for Delamination and Contact Analysis in Composite Plates D. Bruno, F. Greco and P. Lonetti	177
Numerical Evaluation of Mixed Mode Delamination in a UD-Glass/Epoxy Composite and Comparison with Experimental Results M. R. Khoshravan and A. Yourdkhani	187
