i

OVERVIEW

iii

Industrial and Manufacturing Exposures: September 16, 2008

01-Strength of the Evidence linking Industrial Agents with Cancer

Richard Clapp

231-236

02- The Science and Policy of Identifying and Controlling Industrial Cancer Hazards

Devra Lee Davis

237-243

03- Cancer Prevention through a Precautionary Approach to Environmental Chemicals

David Kriebel

245-251

04-Cancer Prevention through a Precautionary Approach to Environmental Chemicals: Policy and Research Recommendations for Moving Forward

Jeanne Rizzo

253-260

05- Priorities for Research and Prevention of Occupational Cancer

Paul A. Schulte and TM Schnorr

261-264

06- Delusions, Illusions and Ongoing Neglect of Hazard Recognition, Regulation and Control of Industrial Carcinogens

Jeanne M. Stellman and Steven D. Stellman

265-269

07- Environmental Factors in Cancer: Trichloroethylene and Related Solvents:

Science, Regulation, and Cancer Prevention

Daniel Wartenberg

271-276

Agricultural Exposures: October 15, 2008

08-Introduction: Pesticides use and exposure, extensive worldwide

Michael C. R. Alavanja

277-283

09- Evaluation of Agricultural Exposures:

The Agricultural Health Study and the Agricultural Cohort Consortium

Laura Beane Freeman

285-290

10-The Mammary Gland: A Tissue Sensitive to Environmental Exposures	
Suzanne E. Fenton	291-296
11- Pesticide Policy and Farmworker Health	
Joan Flocks	297-301
12- The One Stop Shop: Chemical Causes and Cures for Cancer	
Tyrone B. Hayes	303-307
13- Agricultural Exposures and Childhood Cancers	
Peggy Reynolds	309-314
14- What We Know About Pesticides and Breast Cancer	
Sandra Steingraber	315-324
15-Too much of a good thing? Nitrate from nitrogen fertilizers and cancer	
Mary H. Ward	325-330
