

Reviews in the Neurosciences

Instructions to Authors

Manuscripts should be submitted to the Chief Editor, Prof. J.P. Huston, Center for Behavioral Neuroscience, University of Düsseldorf, Universitäts-str. 1, 40225 Düsseldorf, Germany, Fax: (0211) 8112024; Tel: (0211) 8114296; e-mail: huston@uni-duesseldorf.de.

Manuscript Requirements

1. Manuscripts must be written in English and be double spaced throughout the entire text. Manuscripts can be submitted to the Editor by email.
2. Each manuscript must have a title (first) page that includes the title, the authors' full names, the laboratory or origin of the data, a running head, a list of 6-8 key words and the name, address and FAX number of the person to whom correspondence and proofs should be mailed.
3. Full length review articles should be divided into sections in the following order: **Synopsis**, Body (with relevant sub-headings), **Acknowledgements**, **References**. Short notes should contain no sections. Number pages consecutively.
4. *Abbreviations* should be defined when first used by placing in parentheses after the full term; e.g., acetylcholinesterase (AChE).
5. *References* should be cited by numbers between slashes in the text. All references must be listed alphabetically and numbered consecutively. Abbreviations of journal names should conform to the Index Medicus.

Examples of References:

Journal: Damianopoulos EN, Carey RJ. Pavlovian conditioning of CNS drug effects: a critical review and new experimental design. *Rev Neurosci* 1992; 3: 65-77.

Book: Bures J, Buresová O, Huston JP. Techniques and Basic Experiments for the Study of Brain and Behavior. 2nd Ed. Amsterdam: Elsevier, 1983.

Chapter in book: Uhl GR. An approach to in situ hybridization using oligonucleotide cDNA probes. In: Van Leeuwen FW, Buijs RM, Pool CW, Pach O, eds. *Molecular Neuroanatomy*. Amsterdam: Elsevier, 1988; 25-43.

This journal should be cited as *Rev Neurosci*.

6. *Tables and Figures*. Illustrations must be submitted in triplicate and reach the editors in a form suitable for reproduction either across a single column or a whole page. Half-tones should be up to 8.0 cm or 17.0 cm wide; line drawings and tables - 9.0 or 19.0 cm wide. All line art should be professionally drawn and lettered on smooth surface white paper or bristol board. Computer generated figures will be accepted only where they are of a quality comparable to

professionally drawn illustrations. Half-tone photographs should be supplied as sharp, high-quality, black and white prints on glossy paper. Illustrations grouped to form a composite figure should be of similar density to prevent loss of detail when reproduced. Tables may not be retyped, and must be of printable quality. Tables and figures should be numbered in order of their appearance in the text (e.g. Fig. 1,2; Table 1,2). Tables and figures should have their number and the authors' names on the reverse side. Magnification for the micrographs should be indicated by scale bars and not by stating a factor. Sufficient detail should be given in the legend to make it intelligible without reference to the text. Legends should be supplied on separate pages at the end of the text. The cost of color illustrations will be charged to the author. The charge for one page of color is \$1000; second and subsequent pages will cost \$800. Colour figures should be supplied as pdf files.

7. *Galley proofs*. Only printers' errors may be corrected. There are no page changes.

8. *Copyright responsibility*. This is the author's own responsibility. If any figure(s), illustration(s), table(s) or extended quotation(s) etc. are to be taken from material(s) previously published, the author(s) must secure reproduction permission from the copyright owner.

Only original papers will be accepted, and copyright of published papers will be retained by the publisher.

9. *Transfer of author copyright*. Please include a signed release of copyright to Freund & Pettman with your manuscript. Include the title of the article being submitted, as well as the date. Include the signatures of co-authors.

10. *Manuscript editing*. All accepted manuscripts are subject to manuscript editing.

11. *Reprints*. 25 reprints of each paper will be provided free-of-charge. Additional copies in multiples of a hundred may be purchased. A reprint order form will accompany the proofs. Reprints will be sent to the first-named author unless otherwise indicated. A pdf file of the final printed version of the paper can be purchased for USD 60 per page.

The original manuscript and diagrams will be discarded one month after publication unless there is a written request for the material to be returned to the author.

Indexed and abstracted by: BIOSIS, EMBASE/Excerpta Medica, Index Medicus, Neuroscience Citation Index, PsycINFO, Reference Update, Research Alert.

ACKNOWLEDGEMENT

The cover shows a Golgi-impregnated medium size densely spiny neuron from rat striatum. The photomicrograph was kindly provided by Dr. Paul Bolam, MRC Anatomical Neuropharmacology Unit, Department of Pharmacology, South Parks Road, Oxford OX1 3QT, UK.
