LIMB LENGTHENING – FOR WHOM, WHEN AND HOW

This book contains sections on substrates of limb lengthening; final height in short stature syndromes – with and without hormonal treatment; short stature as a handicap; orthopedic aspects of limb lengthening; and who are the candidates for limb lengthening.

Editors: Z. Laron, S. Mastragostino and C. Romano

260 pages, soft cover, published in 1995, ISBN 965-294-117-4

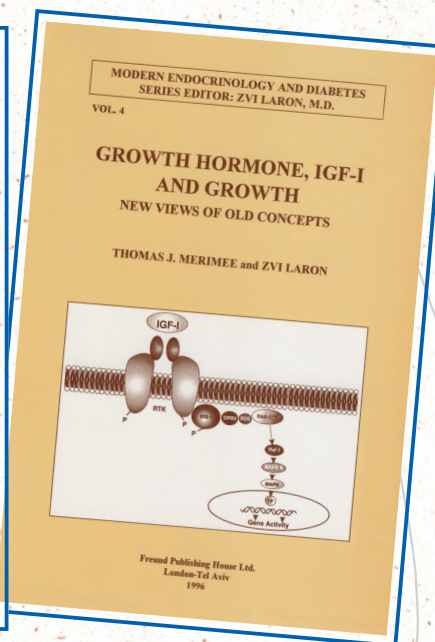

GROWTH HORMONE, IGF-I AND GROWTH: NEW VIEWS OF OLD CONCEPTS

This book reviews the major components of the GHRH-GH-IGF-I axis in normal growth: the hormones, carriers and receptors. It discusses the comparative effects of GH and IGF-I in normal growth, in wound repair and in relevant clinical states. Section 3 discusses the major types of dwarfism.

Authors: T. Merimee and Z. Laron

266 pages, soft cover, published June 1996, ISBN 965-294-092-5

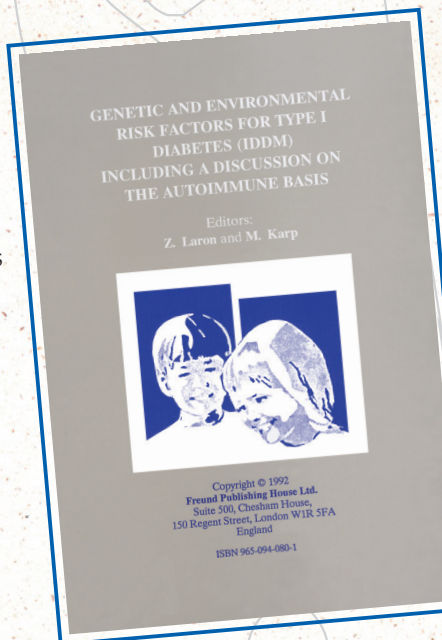

GENETIC AND ENVIRONMENTAL RISK FACTORS FOR TYPE 1 DIABETES

This book contains articles by international experts in the field of diabetes. An interesting departure is a discussion which follows many of the articles.

Edited by Z. Laron and M. Karp

121 pages, soft cover, published in 1992, ISBN 965-094-080-1
